

Care Management

CCM & PCM Program

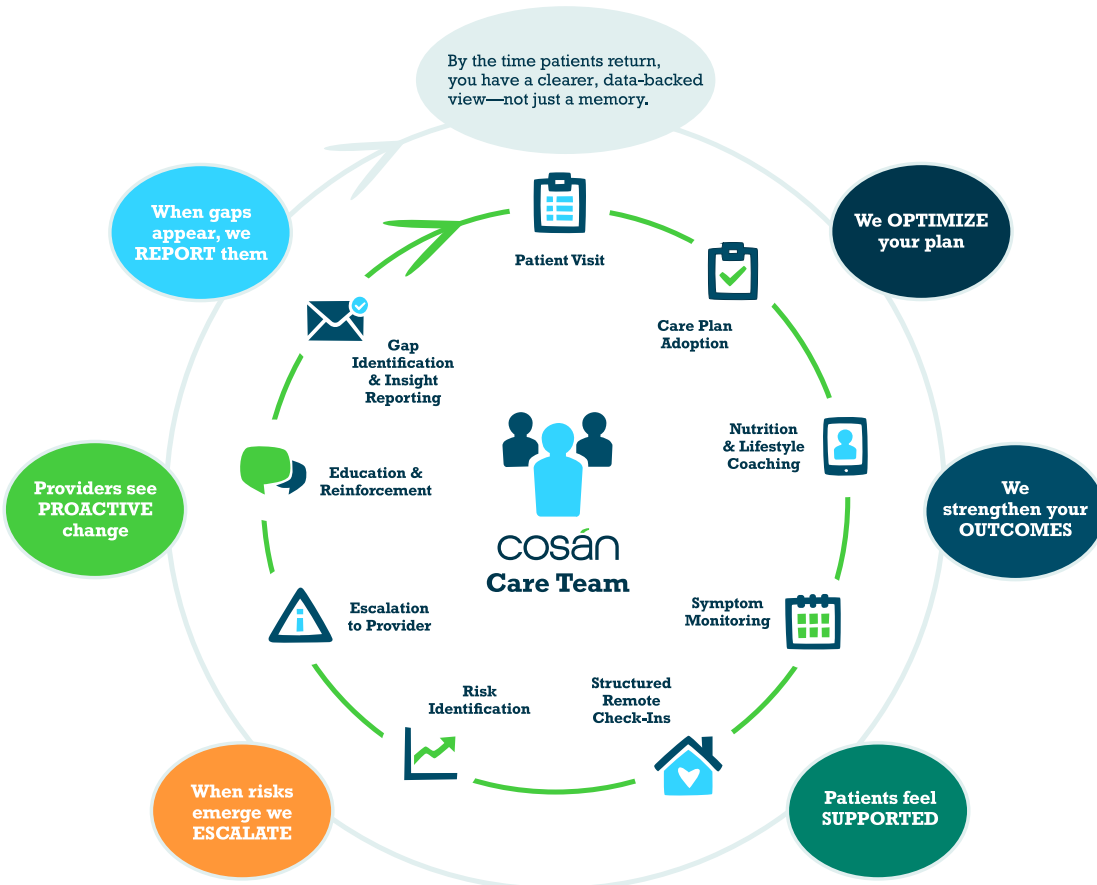

Cosán extends your clinical oversight beyond the exam room — helping patients stay on track while strengthening your practice performance.

The Visit Is Just the Beginning

When patients leave your office, real life begins. Medications are missed. Symptoms go unreported. Lifestyle plans stall.

Cosán becomes your eyes and ears between visits — reinforcing your care plan, identifying risks early, escalating when necessary, and delivering meaningful insight back to your team.

Our Offerings

Chronic & Principal Care Management

Remote Patient Monitoring
Nutrition Support

Functional Health
Behavioral Health

Practice Benefits

1 Measurable Clinical Impact

Over time CCM & PCM programs result in greater patient stability with benefits like reduced hospitalizations, fewer avoidable ED visits, improved quality metrics and stronger medication adherence.

2 Risk Mitigation

We help identify care gaps, reinforce documentation workflows, and surface risk indicators that support your patient's overall care, accurate coding and stronger contract performance.

3 Compliance Confidence

CMS documentation supported by technology and process. Standardized workflows, structured reporting, and consistent documentation protocols support defensible compliance positioning.

4 Ancillary Revenue Expansion

Unlock scalable, recurring CCM & PCM revenue without adding internal headcount. Our 300+ care coordinators operate as an extension of your team—generating structured care management activity without increasing payroll burden.

5 Provider Relief

Reduce administrative burden on your staff while improving quality performance. We manage the outreach, monitoring, and documentation workflows so providers can focus on clinical decision-making and avoid staff being overwhelmed with follow-ups.

What Patients Experience

Real Support. Real Stability.

- Confidence knowing someone is monitoring their progress
- Early intervention before complications escalate
- Clear reinforcement of physician guidance
- Improved medication adherence
- Support navigating diet and lifestyle adjustments
- Fewer avoidable disruptions to care

A Fuller Picture of Your Patients

We deliver:

- Medication adherence trends
- Lifestyle risk indicators
- Escalation history
- Identified care gaps
- Education reinforcement tracking
- Actionable items for next appointment

Each visit becomes more focused, more informed, and more productive.

cosán Your Plan. Extended.
Your Outcomes. Strengthened.

Partner with Cosán to close the gap between visits — and elevate both patient health and practice performance. Visit us:
